ABSTRACTED-PUB-NO: WO 9918215A  
BASIC-ABSTRACT:

NOVELTY - An avian infectious herpesvirus recombinant produced by inserting a foreign gene into an untranslated gene region of the herpesvirus genome, is new.

ACTIVITY - Antiviral.

MECHANISM OF ACTION - Vaccines.

USE - Turkey herpesvirus or Marek's disease virus recombinants are constructed for use in preparing recombinant vaccines, particularly as the active ingredient in chicken vaccines (claimed).

ADVANTAGE - The multivalent live chicken vaccines produced are stable and highly effective and safe.
